Our Services

We Pearl Hiring Private Limited specializes in providing well maintained crane and boom lift rental services to construction, maintenance and industrial sectors. With a focus on safety, efficiency and customer satisfaction, we offer a diverse fleet of equipment suitable for various projects, ranging from small-scale residential jobs to large-scale industrial operations.

Services:

- **Crane Rentals:** We offer a wide range of cranes, including new generation crane, mobile cranes, crawler cranes equipped to handle heavy lifting tasks with precision and reliability.
- **Boomlift Rentals:** Our fleet includes self propelled and truck mounted type articulated and straight boom Boomlifts designed to provide access to your elevated work platform requirement.

Key Features:

- **Safety First:** All equipment undergoes regular maintenance and inspection to ensure compliance with safety standards.
- **Experienced Operators:** Optional certified operators are available to ensure smooth operation and maximize productivity on-site.
- **TPM :** Deliver the equipment at site after total preventive maintenance.

Types of Equipments

Articulated Boomlift

Articulating boomlifts are aerial machines used to access difficult-to-reach locations. Models come with a 360-degree base turntable, so they can swivel in any direction. However, the most notable feature that sets them apart is their joint arm and segmented boom sections.

Straight Boomlift

Straight boomlifts are most often used for new industrial projects, industrial maintenance, electrical work, painting and any other job that requires access at a great height. They are not exclusively used in construction, as many other professions use them, like in event installations and the film industry as per suitable requirement.

Rough Terrain Crane

A rough terrain crane is a type of crane designed specifically for off-road and rough terrain applications. It is equipped with large rubber tires, four-wheel drive and all-wheel steering, making it highly manoeuvrable on uneven and challenging ground surfaces. They are commonly used in construction, oil and gas and other industries where lifting and material handling tasks are required in difficult-to-access or uneven areas.

Truck Mounted Boomlift

Truck Mounted Boomlifts are used in place of self propelled Boomlift for the works needs to be carried out multiple location and specially for chimneys and flares. Plus point of this kind of Boomlift is that it is available in very high range than self propelled Boomlift. They are even compact and very versatile equipment. They have option of Straight and Articulated design structure.

Truck Mount Aerial Platforms are :

1. Great for large height or outreach projects.
2. Suitable for heavy duty works.
3. Ideal when a platform is needed at multiple sites.
4. Used when platforms need to be moved from site immediately after work is completed.

| Weigth (Kg) | 32000 | 32000 | 32000 | 35000 | 38000 |

All Terrain Crane

All-terrain cranes offer versatility and mobility, operating efficiently on both rough terrain and paved roads. They provide powerful lifting capabilities, quick setup and advanced technology features, making them ideal for diverse construction and industrial tasks. Their compact design, stability and operator comfort enhance safety and efficiency, while their flexibility and cost-effectiveness reduce the need for multiple types of equipment.
